

How to cross the "Valley of Death" between research and the forensic market.

V COST Action CA16101 TRAINING SCHOOL

June 22nd – 24th 2021

MULTi-modal Imaging of FOREnsic SciEnce Evidence (MULTI-FORESEE), CA16101, is a scientific network supported by the EU Framework COST Action program (Horizon 2020), to promote innovative, multi-informative, operationally deployable and commercially exploitable imaging solutions to analyse forensic evidence. This includes but is not limited to fingermarks, hair, paint, biological fluids, soil, fibers, documents, digital evidence and living individuals.

MULTI-FORESEE provides the right networking opportunity to push the boundaries of current instrumental and software specifications applied to forensics.

Listen to successful stories from an idea, to R&D, to market. Discuss your ideas, outlining how and when you should start considering the business vision and the ethical and juridical issues during its development to allow new forensic products/services hit the market.

Due to the ongoing pandemic, the training school will be deployed in a virtual environment.

For registration please contact

To register to the TRAINING SCHOOL, please write to the organizing committee (sara.dagoli@unibg.it) before Saturday 19th, 2021 and you will receive the link to participate on Monday 21st, 2021.
